

## Showcase Essentials

This course is your opportunity to learn the visualisation and presentation tools in the Autodesk Showcase software to create compelling presentations of 3D design data. This hands-on-intensive course provides you with the skills to import data for use in a scene, prepare it for presentation, and publish it as an image or movie or in a web presentation format.

# Showcase Essentials

## Who should attend?

First-time users of Showcase who need to quickly create compelling presentations and animations.

## Course Objectives

After completing this course you will be able to:

- Import models and open scenes
- Adjust surfaces
- Select and transform objects
- Assign a visual style to a scene
- Add lighting and shadow environments
- Create and manipulate design alternatives, cross sections, shots and behaviours
- Create a storyboard to present a scene
- Use the pointer tool to focus attention on a specific area
- Publish images, movies and web presentations

## Course Outline

1 Day

### Overview

- Workflow best practices
- The user interface
- Importing models – top tips

### Adjusting Models

- Select objects
- Organiser dialogue box
- Adjust the imported models
- Transforming geometry
- Duplicate and delete objects
- Use visual styles
- Use render modes

### Setting the Scene

- Lighting environments
- Environment lights and shadows
- Accent lights
- Materials
- Image maps
- Decal materials

### Presentation Components

- Design alternatives
- Cross sections
- Shots
- Behaviours

### Preparing a Scene

- Storyboard
- Publishing
- Pointer tool
- Use Compare Scenes for exploring design options

## Prerequisites

None

To enrol call 0845 872 5603 or book online [www.cadassist.co.uk/bookit](http://www.cadassist.co.uk/bookit)
